Northwind API Reference

Base URL: https://api.northwind.example

Authentication

All requests require a bearer token in the Authorization header.
Tokens expire after 24 hours and must be refreshed.

Endpoints

/v1/snapshots GET list snapshots
/v1/snapshots POST start a backup
/v1/restore POST restore files

Rate Limits

The API allows 100 requests per minute per account.
Exceeding the limit returns HTTP 429 with a Retry-After header.

Warnings

Do not call the delete endpoint for an active snapshot.
Deleting an in-progress snapshot can corrupt the recovery chain.
